Landing Page – AI-Powered Smart Inventory Management

Frontend Only

A responsive and user-friendly landing page built with **HTML, CSS, and JavaScript** to showcase an AI-powered smart inventory management system. The page includes:

- **Hero Section** with a catchy headline and call-to-action (CTA) button.

- **Features Section** highlighting key benefits using icons and animations.

- **How It Works Section** with a simple step-by-step guide.

- **Testimonials Section** for user feedback.

- **Contact Form** for inquiries and demo requests.

- **Footer** with social media links and company details.

The frontend design is optimized for **speed, accessibility, and mobile responsiveness**, ensuring a seamless user experience across all devices.
